It is one of my personal favorite books. It is written in easy terms and never hard to understand. It has been designed in an exceedingly easy way and it is only after I finished reading this publication that I in fact changed my way of thinking.

VIROLOGY I: HIV AND RELATED ISSUES

Createspace, United States, 2013. Paperback. Book Condition: New. 254 x 203 mm. Language: English . Brand New Book ***** Print on Demand *****.A virus is a small infectious agent that replicates within living cells of organisms. Viruses infect all types of organisms, from animals and plants to bacteria and archaea. Today, around 5,000 viruses have been reported in detail, although there are potentially millions. In the current post-combination antiretroviral therapy era, HL ranks among the most frequent non-AIDS defining cancers (NADCs) and is an emerging and challenging entity in sub-Saharan Africa. Chapter 3 seeks to outline some PMTCT and child survival issues pertinent to resource limited settings that are to be considered in achieving the WHO strategic plan of reduction of pediatric HIV infection by 2015. Chapter 4 reviews the morphological, physiological and behavioral changes observed in corn earworm moths, (*Helicoverpa zea*) infected with the sexually transmitted, sterilizing virus HzNV-2. Chapter 5 describes the main features of lentivirus derived vectors and the results obtained in the...
