

## The Fauna of the Phosphate Beds of the Park City Formation in Idaho, Wyoming, and Utah

By George Herbert Girty

General Books LLC. Paperback. Book Condition: New. This item is printed on demand. Paperback. 28 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1910. Excerpt: . . . DESCRIPTION OF SPECIES. ANNELIDA CONTTLARIIDE. CONTTLARIA Miller. CONULARIA sp. Plate VI, figure 8. Only two species of Conularia have been described from our upper Carboniferous rocks, *C. roeperi* and *C. crustula*, and the present form is much more similar to the latter than to the former species. It is represented in our collections by but a single specimen, which, when complete, may have had a length of about 25 mm. The cross section is square and the diameter at the larger end about 9 mm. The costae occur 11 in 5 mm. This species differs from *C. crustula* in being more gradually expanding and in having somewhat more closely arranged costae. It is therefore probably new, but the introduction of a new name seems hardly justified at present, because some important characters, such as the sculpture or crenulations on the costae are unknown, not...

### Reviews

*Excellent e-book and useful one. It is written in straightforward phrases rather than confusing. I am just very happy to explain how here is the finest publication I have got read through in my very own lifestyle and might be the greatest book for possibly.*
