

Productivity Enhancement for Manufacturing of Amorphous Silicon Pv Modules: Final Technical Progress Report

Filesize: 6.92 MB

Reviews

Absolutely essential read publication. It is amongst the most incredible book i have study. Your lifestyle period will be convert when you full reading this ebook.

(Dr. Meaghan Streich V)

PRODUCTIVITY ENHANCEMENT FOR MANUFACTURING OF AMORPHOUS SILICON PV MODULES: FINAL TECHNICAL PROGRESS REPORT

DOWNLOAD

To get **Productivity Enhancement for Manufacturing of Amorphous Silicon Pv Modules: Final Technical Progress Report** PDF, make sure you access the web link listed below and download the ebook or have accessibility to additional information which are highly relevant to PRODUCTIVITY ENHANCEMENT FOR MANUFACTURING OF AMORPHOUS SILICON PV MODULES: FINAL TECHNICAL PROGRESS REPORT book.

Bibliogov, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.The overall objective of this subcontract over its two-year duration is to continue the advancement of Energy Photovoltaics, Inc. s (EPV) a-Si production manufacturing technology and improve the production equipment used in manufacturing. This will allow EPV to reduce module costs by increasing module output, throughput, and yield. EPV conducted parallel research efforts for achieving higher stabilized module power output through improvements in several manufacturing processing steps, with particular emphasis on the thin-film deposition process. The dual goals of achieving a 20 gain in stabilized output and a 20 reduction in direct costs were accomplished. The 20 gain in stabilized output increased the power of the standard 0.79 m² module to about 45 watts. This was achieved through optimizing the a-Si deposition process to improve stability, increasing the active area of the module, and developing a ZnO/Al back reflector to increase the light absorption of the a-Si. Additionally, improvements were made to the a-Si uniformity, and an improved TCO was incorporated into the standard product. The goal of reducing costs by 20 was exceeded, resulting in an estimated direct cost of \$1.41/W, for the process in EPV s New Jersey facility. This was accomplished through a complete review of the process that resulted in lower material costs, lower labor costs, less downtime, and higher module power, as noted above. The process was streamlined and made more efficient by eliminating or combining process steps, and selected processes were automated. In addition, improvements were made to the characterization and measurement techniques used in the module optimization process.
