In recent decades, prototype semantics has begun to gain an important role in linguistics and led to a paradigm shift. This is proved by research in cognitive psychology. People have a command of categorising, all times. Without the process of categorisation, our brain would be overstrained because the flood of information, the brain receives, has to be memorised and, thus, categorised, in a certain way. First of all, I will explain the importance of categorisation and concepts in everyday life, then I will introduce some forms of categorisations (Aristotle's traditional view and the prototype theory), explain them by giving examples, analyse and criticise them, insofar as I consider them criticisable. In section three I will describe...
