

Patterns of Perception: Preferred Pathways to Genius

By Peter Fritz Walter

Createspace, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****. Patterns of Perception: Preferred Pathways to Genius (Scholarly Articles, Vol. 16) deals with an important topic both for science and spirituality: direct perception. How do humans perceive reality? Is there something like a universal reality, one that is valid for all of us, or is reality always personal? And how does the memory surface work? Is our school system the right one, or do we have to implement fundamental changes so as to mold our school system after the way our brain learns? Would that not be the most intelligent way of doing it? The author tried to answer these questions in this essay, taking reference to Eastern spiritual traditions as well as Western scientific thinking, with a special focus upon Herbert James Campbell's neurological research on preferred pathways and the pleasure function, as well as Edward de Bono's remarkable research about the nature of the human memory surface. What became clear after general brain research and the special focus upon preferred pathways was the rather astounding coincidence between these scientific findings about super-effective whole-brain...
